

JAMES KERBY C. SARMIENTO

Entry-Level IT Specialist | IT Support | Software Developer | Automation Specialist

0966 498 6223 | james.sarmiento.1456@gmail.com | San Jose, Rodriguez, Rizal

PROFESSIONAL SUMMARY

Bachelor of Science in Information Technology graduate (2026) with hands-on experience across full-stack web development, database design, IT hardware/software support, and business process automation. Solo-developed and delivered a commissioned ticketing system from database design through deployment, in addition to a capstone guidance management system, a client website project, and several production Zapier automations for content publishing, CRM lead management, and lead enrichment. Comfortable moving between writing code, diagnosing hardware, and designing multi-step automated workflows, with a strong foundation in problem-solving and a track record of following projects through to client sign-off. Seeking to bring this blend of development, support, and automation skills to an entry-level IT role.

TECHNICAL SKILLS

Programming & Development: PHP (Laravel, Inertia.js), JavaScript/React, C, C++, Java, VB.NET/.NET, HTML, CSS, Tailwind CSS

Databases: MySQL, NoSQL, Firebase, data modeling & design, CRUD operations

Automation & Integration: Zapier (multi-step workflows, Paths/branching, Filters, Delays, AI by Zapier, Webhooks), workflow design, API/app integrations (Google Drive, Asana, Gmail, Slack, Google Sheets, Apollo)

IT Support & Systems: Hardware diagnostics & troubleshooting, Windows installation/configuration & boot repair, preventative maintenance, system testing & performance evaluation, technical documentation

Tools & Platforms: Git, Visual Studio, VS Code, Filament (admin panels), MS Word, Excel, PowerPoint

AUTOMATION & WORKFLOW PROJECTS (ZAPIER)

Google Drive → Social Media Auto-Publishing Pipeline — Automation Specialist

- Built an end-to-end Zapier workflow that detects new MP3 uploads in a Google Drive folder, transcribes them with AI by Zapier, and auto-generates two distinct blog post variants (title + content).
- Used Paths to split the workflow into two parallel branches, each validating its generated title before auto-publishing the matched title/content pair to LinkedIn, Facebook, or Instagram.

Asana CRM Lead Management Workflow — Automation Specialist

- Designed a 5-branch Zapier automation triggered by Asana task status changes (Ready to Start, No Response, Quoted, Approved, Paid & Closed) to automate the full client lifecycle.
- Automated lead folder creation, subtask generation, multi-stage email follow-ups with delay and response checks, AI-drafted onboarding and thank-you emails, and invoice retrieval from Google Drive.

Lead Gathering & Enrichment with Internal Notification — Automation Specialist

- Built a webhook-triggered Zapier pipeline that captures form leads and enriches them via the Apollo API, using AI by Zapier to validate company size and founding year for qualification.
- Implemented conditional Paths to route high-priority vs. fallback leads, automatically logging each to Google Sheets and notifying the team in real time via Slack/Gmail.

ACADEMIC & PROFESSIONAL PROJECTS

Relay Helpdesk — Commissioned Ticketing System — Solo Full-Stack Developer

- Independently designed, built, and deployed a full IT ticketing/helpdesk platform for a client, owning every stage from database schema to release.
- Built the application on Laravel, Inertia.js, and React with Tailwind CSS, and a Filament-powered admin console for SLA rules, routing, and audit logs.
- Implemented role-based access control across Client, Agent, and Admin roles, plus a full ticket lifecycle with status transitions and a photo-proof-gated resolution workflow.
- Developed a reply/composer system supporting public client replies and internal agent-only notes, with automatic status updates based on activity.
- Added a searchable knowledge base, canned responses, and file attachment support to speed up agent response time.
- Wired up real-time updates with Laravel Reverb/Pusher and covered key flows with automated PHPUnit tests.

Guidance Management and Tracking System — Capstone Project — Lead Desktop App Developer / Full-Stack Developer

- Designed and developed a multi-platform guidance management system for an educational institution, covering student appointment scheduling, report submission, and record management.
- Built administrative tools for managing student cases and generating reports.
- Designed and managed the database structure to ensure data integrity and accessibility.

- Took part in requirements gathering, system design, testing, debugging, and documentation as part of a collaborative team throughout the full development lifecycle.

Commissioned Full-Stack Website Project — *Full-Stack Web Developer*

- Developed a customized website to a client's specifications, from responsive UI design through backend and database integration.
- Implemented authentication, data management, and administrative features as required by the client.
- Tested, debugged, and revised the system to ensure reliability and performance, coordinating directly with the client on requirements and progress updates.

RELEVANT EXPERIENCE

On-the-Job Trainee — *Repair Gadgetz, Commonwealth Ave., Quezon City* January 2026 – April 2026

- Analyzed and rebuilt the shop's website for better functionality and usability.
- Diagnosed and troubleshoot hardware and software issues on computers and other electronic devices.
- Performed system maintenance, OS installation, and software troubleshooting, including Windows boot repair and system recovery.
- Carried out hardware disassembly, cleaning, and reassembly.
- Gained hands-on experience in technical support and customer service.

LEADERSHIP EXPERIENCE

Student Officer — *Colegio de Montalban, Rodriguez, Rizal* July 2022 – May 2024

- Assisted students with inquiries and administrative concerns.
- Maintained records and coordinated student-related activities.
- Developed communication, leadership, and organizational skills.

EDUCATIONAL QUALIFICATIONS

Bachelor of Science in Information Technology — *Colegio de Montalban, Rodriguez, Rizal* Graduated 2026
